

Name :Shah Jash

Enroll no. : 2402030430010

## Step 1 : create github account

Already have an account? [Sign in](#)

### Sign up to GitHub

Email\*

Password\*

Password should be at least 15 characters OR at least 8 characters including a number and a lowercase letter.

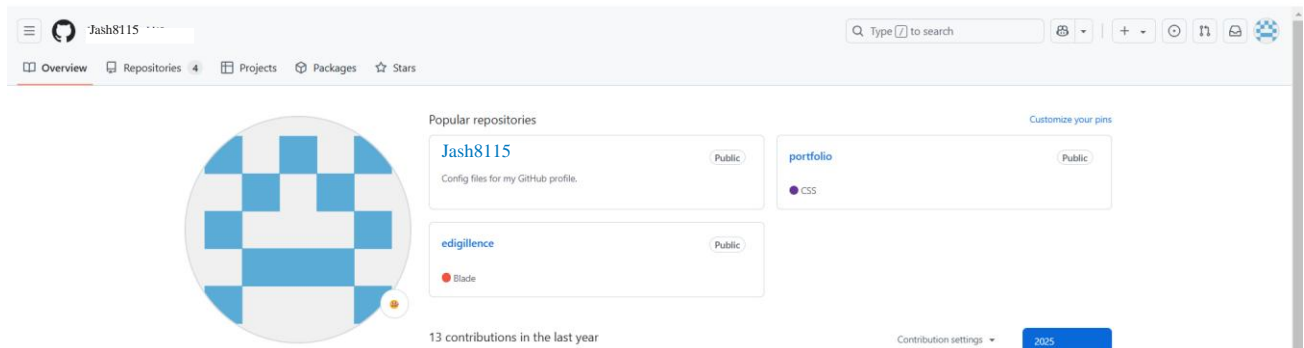

Username\*

Username may only contain alphanumeric characters or single hyphens, and cannot begin or end with a hyphen.

[Continue](#)

By creating an account, you agree to the [Terms of Service](#). For more information about GitHub's privacy practices, see the [GitHub Privacy Statement](#). We'll occasionally send you account-related emails.

## Step 2 : Click on repository

## Step 3 : click on new repository

## step 4 : create the new repository on github

### Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

*Required fields are marked with an asterisk (\*).*

Owner \*

Repository name \*

✓ 2402030430010

Great repository names are short and memorable. Need inspiration? How about **fluffy-pancake** ?

Description (optional)

Public

Anyone on the internet can see this repository. You choose who can commit.

Private

You choose who can see and commit to this repository.

Initialize this repository with:

Add a README file

This is where you can write a long description for your project. [Learn more about READMEs.](#)

Add .gitignore

Choose which files not to track from a list of templates. [Learn more about ignoring files.](#)

Choose a license

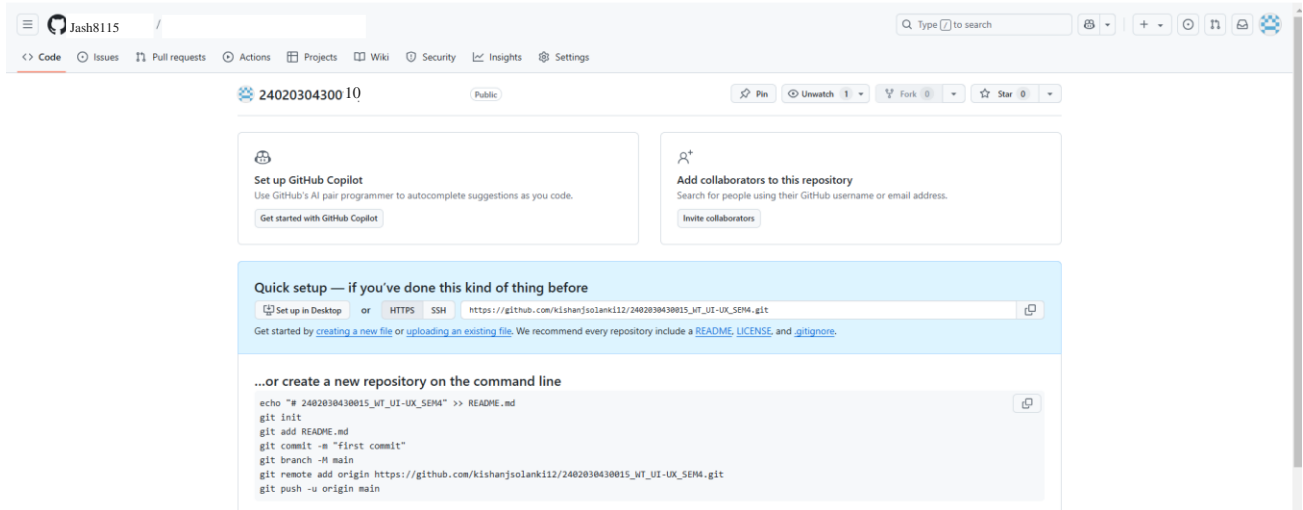

A license tells others what they can and can't do with your code. [Learn more about licenses.](#)

You are creating a public repository in your personal account.

Create repository

step 5 : copy the code and paste in to terminal or shell

step 6 : paste the code in to vs code terminal
